INTERVAL QUIZ PLATFORM · FOR STUDENTS

Student Guide

How to sign in, take a quiz without problems, and see your result.

Exam day checklist:

- Use **Chrome or Edge** on a charged laptop with stable Wi-Fi.
- Close other tabs and apps.
- Sign in a few minutes early.
- Use the **same email** your professor enrolled.

1 Sign in

- **Quickest:** on the sign-in page, click `Sign in with Google` and choose your **@iitrpr.ac.in** account.
- **Or create an account:** click `Register` and enter your name, institute email, entry number (filled in from your email if left empty) and a password of at least 8 characters.

No course on your Home page? Your professor hasn't added your email yet. Ask them to; it appears automatically once they do.

2 Find your quiz

1. Home shows your courses and upcoming exams.
2. Click the quiz (or open the course, then the quiz). You land on the quiz's **pre-exam page**.

3 Before you start

1. On the pre-exam page, read **Rules for this quiz**, the time limit and the number of attempts.
2. Run the `System check` and fix anything it flags.
3. If the quiz has an **Access code**, type the one announced in the hall.
4. Click `Start attempt`. The timer starts now. Some quizzes switch to full screen.

4 During the quiz

- **Answers save automatically.** Watch the save status. You can also click `Save now`.
- **Wi-Fi dropped?** Keep answering. Your answers are kept on this device and sent when the connection returns. Reloading the page is safe.
- **Stay in the quiz.** Depending on the rules, switching tabs or apps, leaving full screen, or copy/paste counts as a **violation**. You get a warning, and too many can lock or auto-submit your attempt.
- **One window only.** Opening the quiz in another tab or device stops the first one (`Continue here instead`). Rejoining after you leave may need your instructor's permission.
- **One-way quizzes:** `Next question` can't be undone. You can't go back.
- **Question unclear?** Click `Raise hand`, then `Ask the invigilator`. The reply and any announcements appear at the top of the quiz.
- **Accessibility:** the **Accessibility** menu in the top bar changes text size, contrast, line spacing and font.

5 Submit

- Click **Submit quiz**, then **Yes, submit**. You can't change answers after this.
- If time runs out, your saved answers are submitted for you.

6 See your result and appeal

- Open **My results** in the top bar. Depending on the quiz, the score shows right after you submit, after your professor releases results, or not at all.
- Open a result to see your score and the marks for each question (and the answer key, if your professor shares it).
- Think a mark is wrong? Click **Appeal this mark** on that question and explain why. You can also appeal a flag or lock on your attempt. Your professor's decision appears on the same page.

If something goes wrong

Problem	What to do
"Quiz not found" / not published	It isn't open yet. Check the time, or ask your professor.
"You are not enrolled in this course"	Ask your professor to add the email you signed in with.
"Quiz paused" or "Quiz closed"	Your instructor did this. Wait for them to resume or reopen it.
Your attempt is locked	Don't open new tabs. Tell the invigilator; only the instructor can unlock it.
Laptop died or browser closed	Sign in again on the same quiz and continue. If it asks for permission, tell the invigilator.
Forgot your password	Use **Sign in with Google** with your institute account instead.
